ABSTRACT

Satellite City is the solution for highly congested cities. Highly congested cities cannot maintain the healthy life-style. Satellite city can give the better life style than congested cities.

Keywords: Satellite City, Parent City, Population, Healthy Living

- According to the space availability near the main city the location of the satellite city was selected. It is not very far & not very close to the parent city. Mainly the location of satellite city selected near the highway & beyond the periphery of the parent city.
- In India approximately after every 28 years the population becomes double. Due to limitation of all resources many peoples are unable to improve their healthy living standards. In this scenario satellite city will play a vital role for the healthy lifestyle of the people in future.
- The satellite city will fulfill its basic requirements but it is not completely independent. As the industrial cluster is negligible or sometimes completely absent, the satellite city environment is healthy & better than the parent city.
- Thus, the load on the basic facilities distributed & the resources life will be used for a long time.
- Satellite cities have their own government & social & corporate life.
